

# Early Kindergarten

At Central Coast Steiner Early Kindergarten, we proudly offer a thoughtfully designed three-day program that introduces children to a harmonious and unhurried approach to education.

Our enchanting, home-like environment is a sanctuary where each child is cherished and nurtured with boundless care. During this pivotal stage of development, learning primarily takes place through the power of example, and our days are dedicated to shared activities such as baking fresh bread for our morning tea.

In the realm of creativity, we embark on artistic adventures, including painting, drawing, craftwork, puppetry, and storytelling. These activities ignite a flame of imagination within each child's heart. Our deep reverence for Mother Nature flourishes as we observe and celebrate the ever-changing seasons together.

Our program generously encourages free, imaginative play. We understand that play is not merely a child's pastime but their genuine work in life, the cornerstone upon which future creativity is built. In addition, we embrace the comforting of rhythm and repetition, fostering a sense of safety and belonging within the new environment.

Gradually, through our daily and weekly rhythms, a profound sense of security and belonging blooms, allowing children to thrive in an atmosphere where all is truly well with the world.
